

VERMONT LAMP RECYCLING PROGRAM RETAILER PARTICIPATION AGREEMENT

Manufacturers of general purpose mercury-containing lamps are required under Vermont law to provide a program in Vermont to collect waste compact fluorescent lamps (waste CFLs) and waste, non-CFL, general purpose mercury-containing lamps (waste general purpose mercury-containing lamps) from “covered entities;” A “covered entity” is any person who presents: 1) any number of waste CFLs, or 2) 10 or fewer waste non-CFL, general purpose mercury-containing lamps. Under this program, lamp manufacturers are covering the cost of providing retailers with waste lamp collection receptacles for use by covered entities, transporting the waste CFLs and waste general purpose mercury-containing lamps for proper disposal, and recycling the eligible material collected.

To participate in the Vermont mercury-containing Lamp Recycling Program (the “Program”), the retailer and, where appropriate, individual retail store locations (collectively referred to herein as “Participant”) must sign this Participation Agreement and return it to the Manufacturers’ Coordinator at the address shown on page 3.

It is understood that the Participant is not responsible for the selection or supervision of the Contractor or for the transportation of materials collected at the Participant’s facilities for disposal, recycling, or otherwise. The Manufacturers’ Coordinator, the Contractor, and the manufacturers of mercury-containing lamps are not agents or employees of the Participant. The manufacturers of mercury-containing lamps shall be responsible for the costs of the ultimate disposal or recycling of the materials collected under the Program.

The Participant certifies to the lamp manufacturers that collection location(s) meet the following criteria:

- The Participant accepts mercury-containing lamps only from covered entities.
- Allowable lamps include waste CFLs and waste general purpose mercury-containing lamps including linear fluorescent lamps that are less than or equal to 8 feet in length, U-tube or Circline fluorescent lamps, and high intensity discharge (HID) lamps. Waste lamps from non-covered entities will not be accepted for recycling under this program.
- The system must include a mechanism for identifying generators disposing of 25 or more CFLs at collection locations and reporting the name and contact information of each such generator to the Program annually.
- Costs incurred at the Participant’s site for accepting and storing waste lamps are not eligible for reimbursement under this Program, nor are the lamp manufacturers responsible for ineligible waste. Submission of ineligible waste may result in lamp manufacturers terminating the Participant’s participation in the program.
- Staff has been trained in the proper handling and storage of universal waste and emergency procedures in the event of breakage for tasks of accepting and processing waste lamps through this program.
- The Participant complies with all applicable requirements of Vermont’s universal waste law and regulations.
- The Participant maintains a storage facility for waste general purpose mercury-containing lamps and/or waste CFLs that is secure, weather tight and complies with all local, state, and federal regulations.
- The Participant ensures that collection containers are located in an area inaccessible to the general public and ensures that all mercury-containing waste general purpose mercury-containing lamps and/or waste CFLs will be accepted by staff to avoid improper handling and packaging for shipment.

VERMONT LAMP RECYCLING PROGRAM RETAILER PARTICIPATION AGREEMENT

(Continued from page 1)

- The Participant takes reasonable steps to guard against incidental breakage of waste CFLs and waste general purpose mercury-containing lamps. The Program will not accept intentionally broken or intentionally crushed lamps.
- The Participant and/or its parent organization are not distributing “private label brand” general purpose mercury-containing lamps or CFLs without fulfilling its/their legal obligation to fund and implement an approved collection plan under 10 V.S.A. Chapter 164A, enacted as Senate bill 034, “An act relating to the collection and disposal of mercury-containing lamps.”

As a condition of its participation in the Program, and in consideration of the sponsoring manufacturers providing the financial support for this Program and other good and valuable consideration, Participant agrees to indemnify, hold harmless, and defend the sponsoring manufacturers of mercury-containing lamps supporting this Program and the Manufacturers’ Coordinator, their respective directors, officers, employees, representatives, successors and assigns, jointly and severally, from any demand, claim, liability, action, cause of action, lawsuit, loss, damage, injury, penalty, fine, expense, cost, injunction, settlement or judgment of any kind or nature (“liabilities”), whether such liabilities are contingent or mature, whether such liabilities are premised on a violation, breach, or failure to comply with any statute, ordinance, administrative regulation, or under theory of common law, at law or equity, asserted by any person, corporation or other entity, including any governmental entity, arising out of or connected with the Participant’s failure to comply with the criteria set forth above, or the errors or omissions, whether accidental or intentional, of the Participant, its employees, agents, or representatives prior to or while transferring the waste lamps for management and recycling under the Program, whether or not such liabilities occur or arise at the Participant’s premises. Additionally, the Participant agrees to the terms and conditions of Veolia, ES in connection with using Veolia, ES containers under this Program (a copy of which is provided herewith).
